- Reading Books(Growth Related)

PROJECTS

- PORTFOLIO - I created a personal portfolio using React JS and it is an SPA (Single Page Application) as well. It showcased my works and my frontend design skills. It also has my resume which is downloadable.
- E-Quotes - It is a web app created with React Js + Firebase, A user can read, write, update, delete quotes, can download quotes as image, like/dislike feature, comment feature, no. of downloads, google authentication for sign in and sign out
- Recipe finder web app - I created this web app using an API that have all the data related to recipes like summary, steps to cook, ingredients, health score, preparation time, veg or non veg, etc and it is also created using React JS along with Tailwind and Bootstrap 5. The overall UI is also good.
- Contact App - This is a Full-Stack MERN web app using Redux for state management in React JS. It also has feature of search by name and number and the UI is also good.
- Knowledge Earth - This is my personal Project where I fetched the Wikipedia data using its API, I created this project in React JS and it is a SPA(Single Page Application) where the searching and data fetching and rendering it in UI is done without reloading the page
- Photo Glob - This is also an API based project where I used the UNSPLASH API and created an WEB APP where user can search and download Images of high quality for free.
